**CME Certification Provided by the Center for Continuing Education
Tulane University Health Sciences Center**

Accreditation

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of Tulane University Health Sciences Center and the Southern Regional Meetings. Tulane University Health Sciences Center is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Designation

Tulane University Health Sciences Center designates this live activity for a maximum of **18.5 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Tulane University Health Sciences Center and the Southern Regional Meetings present this activity for educational purposes only and do not endorse any product, content of presentation or exhibit. Participants are expected to utilize their own expertise and judgment while engaged in the practice of medicine. The content of the presentations is provided solely by presenters who have been selected because of their recognized expertise.

Overview

The missions of the organizations that make up the Southern Regional Meetings are to foster research from young investigators and provide a forum in which this research can be successfully submitted, discussed, debated and improved with respectful interactions with both peers and mentors. The Southern Regional Meetings bring together researchers, clinicians and students to review the current research and its impact on the future of medical care.

The Joint Plenary session for SRM 2014 is entitled Transition – More than “Graduating to the Cliff’s Edge”: Examining the Evidence that good Transition is Good Care. This session will focus the role of transitioning of patients with chronic diseases from pediatric caregivers to adult physicians. The session will use three common conditions (congenital heart disease, cystic fibrosis, and neural tube defects) as examples. The presenters will focus on the challenges and successes of each type of transition program as well as evidence regarding improved clinical outcomes.

Statement of Need

Clinicians and clinician scientists need to increase their competence in providing the best and most innovative treatment modalities for their specific patient populations. Collaboration among peers participating in these research and translational efforts is vital. These clinicians and clinician-scientists need to increase their competence in applying strategies by the clinical guidelines and current research into the treatment of their specific patient populations.

Goal

The goal of this activity is to improve patient care by increasing learner competence in evaluating and incorporating appropriate transition of care into practice while informing additional research projects.

Educational Objectives

After participating in this educational activity, the participant should be better able to:

- Identify the current state of the art for pediatric chronic disease.
- Discuss the need for transition of care programs as children age into adulthood.
- Identify the specific challenges and needs for pediatric patients with neural tube defects.
- Explain the specific challenges and needs for pediatric patients with congenital heart defects.
- Identify the specific challenges and needs for pediatric patients cystic fibrosis.
- Evaluate the current research from young investigators in the subspecialty areas.
- Discuss the future development possible from current research trends and mentoring with colleagues and students.

Predicted Outcomes

Predicted Changes in Practice as a result of this activity may include:

- Review the new discoveries for applicability to the clinical and quality guidelines for these patient populations.
- Implement at least one new strategy into clinical practice.
- Engage in the mentoring process for young investigators.
- Develop/modify research to incorporate collaborative projects or improve current practice.
- Assess practice according to at least one guideline presented in the conference to determine current practice effectiveness. (Could be the first step in an individual performance improvement project for submission as part of MOC.)

Tulane Disclosure Policy

It is the policy of the Center for Continuing Education at Tulane University Health Sciences Center to plan and implement all of its educational activities in accordance with the ACCME's Essential Areas and Policies to ensure balance, independence, objectivity and scientific rigor. In accordance with the ACCME's Standards for Commercial Support, everyone who is in a position to control the content of an educational activity certified for *AMA PRA Category 1 Credit*TM is required to disclose all financial relationships with any commercial interests within the past 12 months that creates a real or apparent conflict of interest. Individuals who do not disclose are disqualified from participating in a CME activity. Individuals with potential for influence or control of CME content include planners and planning committee members, authors, teachers, educational activity directors, educational partners, and others who participate, e.g. facilitators and moderators. This disclosure pertains to relationships with pharmaceutical companies, biomedical device manufacturers or biotech firms. Any real or apparent conflicts of interest must be resolved prior to the educational activity. Disclosure of off-label, experimental or investigational use of drugs or devices must also be made known to the audience.

A comprehensive DISCLOSURE List is available at the registration desk. The list includes all participating individuals who have:

- Financial relationships with a commercial interest (Any real or apparent conflicts of interest have been resolved prior to the educational activity).
- No financial relationships to disclose.
- Presentations that will involve comments or discussions concerning unapproved or off-label uses of a medical device or pharmaceuticals.

This CME Activity may address components of the following competencies:

IOM Competencies: Providing patient-centered care, Working in interdisciplinary teams, Employing evidence-based practice, Applying quality improvement, Utilizing informatics.

ABMS Competencies: Patient Care, Medical Knowledge, Practice-based Learning and Improvement, Interpersonal and Communication Skills, Professionalism, Systems-based Practice.

The ACCME Task Force on Content Validation and Eligibility for Accreditation states that the validity of content be based on evidence that is sound and reasonable justification.

- "All the recommendations involving *critical* medicine in a CME activity must be based on evidence that is accepted within the profession of medicine as adequate justification for their indications and contraindications *in the care of patients.*"
- "All scientific research referred to, reported or used in CME in support or justification of a patient care recommendation must conform to the generally accepted standard of experimental design, data collection and analysis."

An Electronic Credit Request/Evaluation Survey Will Be Emailed To You After The Program. This electronic survey will allow you to provide your evaluation of this educational activity in addition to requesting *AMA PRA Category 1 Credits*TM.

You will receive the link and instructions in your **Email Inbox on Monday, February 24, 2014**. If you do not receive your link to the evaluation in your email inbox, please contact us at cme@tulane.edu.

Please complete the evaluation and credit verification form **by Monday, March 24, 2014**. Certificates for this conference will be issued by **Wednesday, March 26, 2014**. Original certificates for this conference may be claimed until February 22, 2015. Duplicate certificates are available at any time.

Thursday, February 20, 2014**12:00 PM – 4:00 PM****Pontalba – First Floor****MANUSCRIPT PREPARATION AND PEER-REVIEWED PUBLICATION****Workshop Leader:** *Thomas R. Welch, Associate Editor, Journal of Pediatrics, SUNY Upstate Medical University*

This workshop will address multiple aspects of publication in scientific journals. Presenter will discuss preparation of materials, including the initial decision that the data are sufficient to justify publication. Issues related to manuscript writing will include length, focus, adherence to journal formats, and referencing. The editorial process from submission to publication will be described in-depth with particular attention to ways in which authors can interact with journal editors. Another section will cover ethical issues in publication including review boards, authorship, duplicate publication, intellectual property rights, and conflict of interest. There will be open discussion of sample cases and questions derived from the experiences of the participants.

WORKSHOP SESSION

ACADEMIC PEDIATRIC ASSOCIATION

Friday, February 21, 2014

8:00 AM – 12:00 PM

Vieux Carre B – First Floor

DON'T RE-INVENT THE WHEEL: SHARING IDEAS FOR COMMUNITY PEDIATRICS AND ADVOCACY TRAINING

Workshop Leaders: Nancy Kelly, Marny Dunlap, and Annamaria Church, *UT Southwestern Medical Center, University of Oklahoma Health Sciences Center, and University of Tennessee COM-Chattanooga respectively.*

In this workshop, pediatric residency training programs will share resources to optimize community pediatrics/advocacy education for all residents. Participants will hear about relevant websites and unique educational activities from three residency programs before discussing barriers and ideas for pediatrics advocacy training. Finally, participants will begin steps to create a regional network of individuals interested in teaching community pediatrics/advocacy.

AN OBJECTIVE MEASURE OF PARENTING SKILLS FOR THE PEDIATRICIAN

Workshop Leaders: Gail Beeman, Marion Hare, Kristen Bettin, and Steven Pishko, *University of Tennessee Health Science Center*

Better parenting is associated with better childhood outcomes. In pediatric practice, parenting is often evaluated subjectively, but objective measures are available. This workshop will introduce a specific tool that can be adapted for clinical evaluation of parenting and follow up after intervention. This interactive workshop will cover the scoring process, potential uses, and challenges of objective assessment of parenting a clinical setting.
