CME CERTIFICATION PROVIDED BY THE CENTER FOR CONTINUING EDUCATION TULANE UNIVERSITY HEALTH SCIENCES CENTER

PROGRAM OBJECTIVES: At the conclusion of this educational activity, the participant should be better able to: Translate new information and findings from basic and clinical research into professional skills and performance improvement as defined by the Core Competencies for Maintenance of Certification 2) Apply new scientific knowledge gained to identify areas of investigation that will inform research and to improve patient care and safety 3) Implement new tools for teaching and practicing medicine 4) Teach and educate caregivers to improve the outcomes for patients 5) Apply knowledge from career development workshops to writing grants and manuscripts, designing and analyzing trials.

ACCREDITATION: This activity has been planned and implemented in accordance with the Essentials and Standards of the Accreditation Council for Continuing Medical Education through the joint sponsorship of Tulane University Health Sciences Center and the Southern Regional Societies. Tulane University Health Sciences Center is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Tulane University Health Sciences Center designates this educational activity for a maximum of 21.25 *AMA Physician's Recognition Award category 1 credits*TM. Each physician should claim only those hours of credit that he/she actually spent in the educational activity.

Tulane University Health Sciences Center presents this activity for educational purposes only and does not endorse any product, content of presentation or exhibit. Participants are expected to use their own expertise and judgment while engaged in the practice of medicine. The content of the presentations is provided solely by presenters, who have been selected because of their recognized expertise.

PROCEDURE FOR CME CREDIT: To receive the appropriate number of CME credits, it is important to do the following:

- Upon arrival, pick up your verification form at the Registration Desk.
- On your departure, turn in your completed verification form at the Registration Desk.

A listing of the number of credits available each day will be included with the verification form.

Program hours that run simultaneously or overlap are not included in the total credits available each day.

DISCLOSURE: It is the policy of the Center for Continuing Education at Tulane University Health Sciences Center to plan and implement all of its educational activities in accordance with the ACCME's Essential Areas and Policies to ensure balance, independence, objectivity, and scientific rigor. In accordance with the ACCME's 2004 Standards for Commercial Support, everyone who is in a position to control the content of an educational activity certified for *AMA PRA Category 1 Credit™* is required to disclose all relevant financial relationships with any commercial interests within the past 12 months that create a real or apparent conflict of interest. Individuals who do not disclose are disqualified from participating in a CME activity. Individuals with potential for influence or control of CME content include planners and planning committee members, authors, teachers, educational activity directors, educational partners, and others who participate, for example, facilitators and moderators. This disclosure pertains to relationships with pharmaceutical companies, biomedical device manufacturers, or other corporations whose products or services are related to the subject matter of the presentation topic. Any real or apparent conflicts of interest related to the content of the presentations must be resolved prior to the educational activity. Disclosure of off-label, experimental, or investigational use of drugs or devices must also be made known to the audience.

INTRODUCTION TO STATISTICAL GENETICS WORKSHOP

Workshop Leader: David B. Allison, Professor of Biostatistics, Head, Section on Statistical Genetics, Department of Biostatistics, *University of Alabama at Birmingham*
 Hemant K. Tiwari, Department of Biostatistics, *University of Alabama at Birmingham*

This is an entry level interactive workshop on statistical genetics for scientists, targeting established investigators, post-doctoral fellows, and advanced graduate students. Topics will include genome-wide analysis, microRNA, epigenetics, gene expression analysis, and data mining. This course will offer an interactive program designed to enhance researchers' ability to request and interpret sophisticated statistical genetic analysis performed by others.

1:00 PM–5:00 PM
 PELICAN I – THIRD FLOOR

MANUSCRIPT PREPARATION AND PEER-REVIEWED PUBLICATION

Workshop Leader: Thomas R. Welch, Associate Editor, *Journal of Pediatrics, SUNY Upstate Medical University*

This workshop will address multiple aspects of publication in scientific journals. Presenter will discuss preparation of materials, including the initial decision that the data are sufficient to justify publication. Issues related to manuscript writing will include length, focus, adherence to journal formats, and referencing. The editorial process from submission to publication will be described in-depth with particular attention to ways in which authors can interact with journal editors. Another section will cover ethical issues in publication including review boards, authorship, duplicate publication, intellectual property rights, and conflict of interest. There will be open discussion of sample cases and questions derived from the experiences of the participants.

1:00 PM–5:00 PM
 POYDRAS – THIRD FLOOR
 SSGIM PRE-COURSE

PATIENT CENTERED MEDICAL HOMES: PATIENT AND PROVIDER IMPLICATIONS

Pre-course Leader: Gregg Talente, *Brody School of Medicine at East Carolina University*

This pre-course will provide physicians with the knowledge to develop an integral understanding of medical home initiatives from policy to implementation and subsequent evaluation. Current controversies regarding healthcare policy initiatives on funding for implementing medical homes, compensation of physicians and the Medicare Medical Home Demonstration project will also be addressed. Interactive sessions directed by faculty moderators will allow participants to engage in open dialogue with experts in the medical home field to solidify key concepts. This interactive precourse will challenge participants to develop a comprehensive and

integrated understanding of Patient Centered Medical Home models and debate options for sustainable funding and compensation through policy discussion and illustrative real world examples.

**1:00 PM–5:00 PM
PELICAN II – THIRD FLOOR**

GRANT WRITING WORKSHOP

Workshop Leader: Henrietta Bada, *University of Kentucky, Lexington*
Nicolette Borek, *National Institute on Drug Abuse*

This workshop is designed for trainees and Young Investigators interested in writing a successful grant application. The discussion will focus on overview of different institutes and priorities; the role of program officer vs SRO and mechanisms (KIOSK) for grant support with recommendations for young investigators. The workshop will include the actual process of writing an grant application with emphasis on writing the various components. The process will also be discussed from the reviewer's aspect giving the attendee information about members of the review panel and their approach to a successfully funded grant application.

SSGIM PRECOURSE

Patient Centered Medical Homes: Patient and Provider Implications

Workshop Leaders: Gregg Talente, *East Carolina*

This precourse will provide physicians with the knowledge to develop an integral understanding of medical home initiatives from policy to implementation and subsequent evaluation. Current controversies regarding healthcare policy initiatives on funding for implementing medical homes, compensation of physicians and the Medicare Medical Home Demonstration project will also be addressed. Interactive sessions directed by faculty moderators will allow participants to engage in open dialogue with experts in the medical home field to solidify key concepts. This interactive precourse will challenge participants to develop a comprehensive and integrated understanding of Patient Centered Medical Home models and debate options for sustainable funding and compensation through policy discussion and illustrative real world examples.
