

Eastern Regional Meeting Abstracts Subject Index

A

Acanthopanax senticosus harms extracts in microglial Bv-2 Cells, inhibition of endotoxins lipopolysaccharide-induced neuroinflammation by, P18

Acute asthma in the pediatric emergency department, electronic medical record (EMR) data for, MP6

Acute rhinovirus infection and respiratory morbidity in severe premature children, cytokine airway responses to, 1

Adalimumab on expression of leptin and leptin receptor in THP-1 human macrophages, comparative effect of ustekinumab and, 23

Adenosine A2A and A3 receptors in macrophage polarization, role of, 15

Adipose tissue fibrosis improves insulin sensitivity in obese humans, vitamin D repletion reduces and, 14

African American (AA) children gender differences in children with forearm fractures, MP9

with inadequate calcium intake, 6

Airway epithelium, mitotic asynchrony induces a pro-inflammatory state in, 12

Anoxic peripheral nerve, effect of metabolic substrates on, 11

Anti-hypoxia effects of Paecilomyces Tenuipes N45 extracts, studies on the, P14

A3 receptors in macrophage polarization, role of Adenosine A2A and, 15

Asthmatic airway fibroblasts, TGFβ signaling in, MP12

Asthmatic-derived epithelium regeneration, in vivo evidence in a xenograft model for, 2

B

Bendamustine, autoimmune hemolytic anemia following treatment with, P11

Benign ovarian masses, plasma and tissue microRNA patterns discriminate malignancy in patients with, 17

Body mass index and physical activity in college-age populations, type 2 diabetes associated beta-adrenergic receptor polymorphisms are independently associated with, P2

Bone marrow megakaryocytes, material basis of total flavonoids of Sarcandra glabra promoting the proliferation of, P9

Bone mineral density in Young African American populations, susceptibility to obesity and, P5

Breast cancer patients, single nucleotide polymorphisms in germ line DNA of CDK4, FANCB, FANCC and MEN1 in, P8

Breast tissue samples, tissue microRNA patterns reliably discriminate for presence of malignancy in, P3

C

Calcium intake, characteristics of African American children with inadequate, 6

Cancer and cardiovascular risk models, review and identification of neural networks tools used in, 25

Cardiovascular implantable electronic devices (CIEDs), perioperative management of, MP2

Carotid blowout syndrome, novel approach to the management of, P12

Cholesterol efflux gene expression in THP-1 macrophages, exosome effect on, 5

Cholesterol transport proteins, activated M1 macrophages display pro-atherogenic changes in, MP1

Coronary artery anomaly, P19

CT angiography, venous duplex, and V/Q Scan, positive predictive values of positive D-dimer levels in venous thromboembolic events diagnosed by, 19

Cyclosporin A (CsA) in the treatment of systemic lupus erythematosus, role of, 4

D

Diagnostic cardiac fellows increase radiation exposure and procedural times, participation of, MP3

Diffuse alveolar hemorrhage (DAH), etiology of, MP13

E

Emergency department (ED) predicts hospitalization and utilization, pediatric asthma severity score in, 18

Esophageal adenocarcinoma patients treated with esophagectomy, impact of perineural invasion in, 7

F

18-Fluorodeoxy glucose PET-CT in psoriasis, insulin resistance determines severity of vascular inflammation by, 28

Food allergy, role of gut microbiome in the development of, 26

Forearm fractures, gender differences in children with, MP9

G

Gamma glutamyl carboxylase gene affects bone quality in a pediatric African American cohort, genetic variant in, MP4

Glucocorticoid treatment in gout patients, effects of, P21

Gut microbiome in the development of food allergy, role of, 26

H

Hemophagocytic lymphohistiocytosis (HLH), P20

Hepatic steatosis and metabolic syndrome, serum IGF1 and insulin resistance, 8

Hepatocellular carcinoma by MALDI-TOF/TOF MS and validation of clusterin in cells and tissues, screening for potential serum protein biomarkers in, P13

Homocysteine level in stroke patients, PFO closure reduces, P1

Human intestinal Caco-2 Cells, uptake of spinosin from the apical membranes of, P16

Human metapneumovirus (HMPV) infections in premature children, human antiviral airway immune responses of, 13

I

Inadequate calcium intake, African American children with, 6

In vivo model, epithelial repair processes and airway remodeling in, 2

L

Lean body mass and bone morphometry in men, genetic variation in neuromedin U influences, 9

Leptin and leptin receptor in THP-1 human macrophages, comparative effect of ustekinumab and adalimumab on expression of, 23

Low-acuity pediatric emergency department patients, variability in antibiotic use in, 27

Lung epithelium, obesity derived adipocyte exosomes alter TGFβ signaling gene expression in, MP11

M

Macrophage, role of adenosine A2A and A3 receptors in, 15

Metabolic substrates on intermittently anoxic peripheral nerve, effect of, 11

Metabolic syndrome and hepatic steatosis, serum IGF1 and insulin resistance, 8

Microglial Bv-2 Cells, inhibition of endotoxins lipopolysaccharide-induced neuroinflammation by acanthopanax senticosus harms extracts in, P18

Mycophenolate mofetil in the treatment of systemic lupus erythematosus, role of, 4

N

Nasal airway microbiota during rhinovirus infection in full term and in premature infants, characterization of, MP7

Negative hepatitis C virus (HCV) screening test results, P6

Neural networks tools used in Cancer and cardiovascular risk models, review and identification of, 25

Neuromedin U (NMU) influences lean body mass and bone morphometry in men, genetic variation in, 9

Non-ST elevation myocardial infarction (NSTEMI), correlation of TIMI risk scores with extent of CAD in patients with, MP14

O**Obesity**

- adipocyte exosomes alter TGF β signaling gene expression in lung epithelium, MP11
 - asthmatic airway fibroblasts, TGF β signaling in, MP12
 - and bone mineral density in Young African American populations, susceptibility to, P5
 - exosome effect on cholesterol efflux in thp-1 human macrophages, 5
 - vitamin D repletion reduces adipose tissue fibrosis and improves insulin sensitivity in, 14
- Opioid receptor activation, hypoglycemic counterregulation in humans is impaired by, 16
- Oral allergy syndrome, case of systemic sclerosis in a female with, allergic rhinitis and associated with, P17
- Outpatient HF management and readmission prevention is patient education, 21
- Ovarian cancer, frequent single nucleotide polymorphisms (SNPs) in 13 genes seen in, P6

P

- Paecilomyces Tenuipes N45 extracts, studies on the anti-hypoxia effects of, 13
- Palliative care, pediatric critical care transport as a conduit to, P15
- Patent foramen ovale (PFO) stroke in pregnancy clinical characteristics of, MP5 outcomes, MP8
- Pediatric African American cohort, gamma glutamyl carboxylase gene affects bone quality in, MP4
- Pediatric asthma, microbiome characterization and host gene expression in, MP10
- Pediatric emergency department (PED) providers, variation in test ordering for low acuity patients by, P10
- Perineural invasion in patients with esophageal adenocarcinoma treated with esophagectomy, impact of, 7

- Pregnancy, patent foramen ovale (PFO) stroke in clinical characteristics of, MP5 outcomes, MP8
- Premature children, cytokine airway responses to acute rhinovirus infection and respiratory morbidity in, 1
- Psoriasis insulin resistance determines severity of vascular inflammation by 18-fluorodeoxy glucose PET-CT in, 28 vascular inflammation in the aorta is related to coronary plaque burden in, 3

R

- Rhinovirus (RV) infection cytokine airway responses to, 1 in full term and in premature infants, MP7

S

- Sarcandra glabra promoting the proliferation of bone marrow megakaryocytes, material basis of total flavonoids of, P9
- Single nucleotide polymorphisms (SNPs) in 13 genes seen in ovarian cancer as compared to benign and control tissues, P4 in germ line DNA of CDK4, FANCB, FANCC and MEN1 in breast cancer patients, P8
- Spinoin from the apical membranes of human intestinal Caco-2 cells, uptake of, P16
- Stroke patients, PFO closure reduces high homocysteine level in, P1
- Surveillance to predict hospitalization in acute asthma in the pediatric emergency department, electronic medical record (EMR) data for, MP6
- Systemic lupus erythematosus (SLE), diagnosis of, MP13

T

- THP-1 human macrophages comparative effect of ustekinumab and adalimumab on expression of leptin and leptin receptor in, 23

- effect of mycophenolate mofetil and cyclosporin A on atherogenic lipid accumulation in, 4
- exosome effect on cholesterol efflux in, 5
- Thrombolysis in myocardial infarction (TIMI) risk scores, correlation of, MP14
- Thyroid-stimulating hormone (TSH) in acutely hospitalized patients, prospective observational quality assurance study of cost-effectiveness of, 24
- Tissue microRNA patterns discriminate malignancy in patients with benign ovarian masses, plasma and, 17

U

- Upright T wave (UTW) in lead V1 predict left anterior descending artery lesion and/or a left circumflex artery lesion on cardiac catheterization, 22
- Ustekinumab and adalimumab on expression of leptin and leptin receptor in THP-1 human macrophages, comparative effect of, 23

V

- Vascular inflammation (VI) in the aorta is related to coronary plaque burden in psoriasis, 3 by 18-fluorodeoxy glucose PET-CT in psoriasis, insulin resistance determines severity of, 28
- Venous duplex, and V/Q Scan, positive predictive values of positive D-dimer levels in venous thromboembolic events diagnosed by CT angiography, 19

X

- Xenograft model for asthmatic epithelium driving airway remodeling, in vivo evidence in, 2
