Fig. S1. Risk of bias summary for included studies, showing each risk of bias item for every included study.

Fig. S2. Risk of bias graph presenting each risk of bias item as percentages across all included studies.

Fig. S3. Subgroup analysis of all adverse events based on the duration.

Fig. S4. Subgroup analysis of cardiovascular disease based on the duration.

Fig. S5. Subgroup analysis of trough $\mathrm{FEV}_{1}$ based on the drug type. Abbreviation:

A: Aclidinium, Gly: Glycopyrronium, Tio: Tiotropium, U:umeclidinium, R: revefenacin.

Fig. S6. Subgroup analysis of trough $\mathrm{FEV}_{1}$ based on the treatment duration.

Fig. S7. Subgroup analysis of trough $\mathrm{FEV}_{1}$ based on the inhaler of LAMA.

Abbreviation: DPI: Dry Powder Inhaler, JN: Jet Nebulizer, MDI: Metered Dose

Inhaler, SMI: Soft Mist Inhaler.

Fig. S8. Forest plot of TDI focal score in COPD patients with LAMAs versus placebo.

Fig. S9. Forest plot of TDI responders in COPD patients with LAMAs versus placebo

Fig. S10. Forest plot of SGRQ score in COPD patients with LAMAs versus placebo.

Fig. S11. Forest plot of SGRQ responders in COPD patients with LAMAs versus placebo.

Fig. S12. Forest plot of the number of patients with at least one moderate or severe exacerbations with LAMAs versus placebo (subgroup analysis based on the drug type). Abbreviation: A: Aclidinium, Gly: Glycopyrronium, Tio: Tiotropium, U:umeclidinium, R: revefenacin.

Fig. S13. Forest plot of the number of patients with at least one moderate or severe exacerbations with LAMAs versus placebo (subgroup analysis based on the duration)

Fig. S14. Sensitivity analysis of all adverse events.

Fig. S15. Sensitivity analysis of cardiovascular events.

Fig. S16. Sensitivity analysis of trough FEV1.

Fig. S17. Sensitivity analysis of the reduction of COPD exacerbation.

Fig. S18. Funnel plot for publication bias.

Table S1. Characteristic of included studies.
